

Supplementary materials

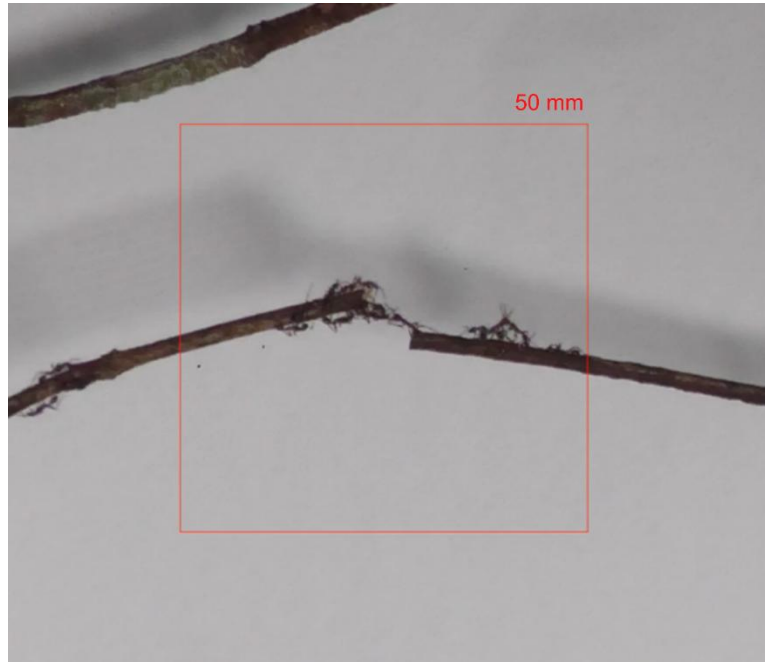

Figure S1. Observation area as a square area surrounding the gap of the twigs in 50 x 50 mm.

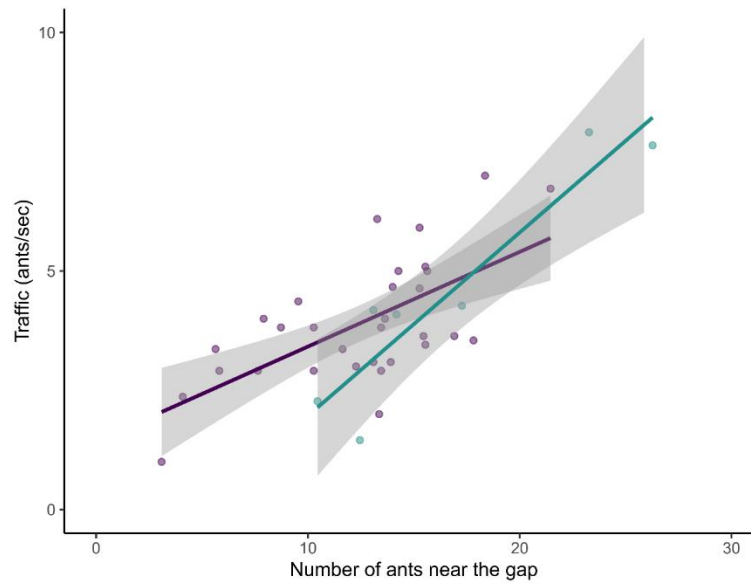

Figure S2. Relationship between the number of ants near the gap and traffic flow. Green indicates when the bridge is formed, while purple indicates when the bridge is not formed.

Figure S3. Clustering behavior, including a chain formation, by *Aenictus* sp. The photo was taken on June 6, 2023, on the same day as the bridge observations in the same field locality.
